

TECHNICAL AND DIMENSIONS

Concrete blocks

Precision concrete masonry units are the most widely utilized type of concrete block. Precision blocks have the square edges and the smooth texture that are most commonly associated with concrete block. When specifying concrete masonry units, the dimensions are indicated in the following manner: width x height x length. Dimensions of precision masonry units are usually expressed in terms of their nominal size.

- 200 x 200 x 400 mm (8") Block
- 150 x 200 x 400 mm (6") Block
- 100 x 200 x 400 mm (4") Block

Selection

we have one of the largest selections of gray sizes and shapes in our factory. Our overall gray block inventory is unbeatable.

How does this help our customers? We have plenty of products to meet even the largest jobs around.

Meeting Your Needs

Our gray block is available in normal and lightweight...whatever fits your needs. Looking for a special size or shape? Browse through our sizes and shapes section to find what you need. If you can't find what you want, please call our sales department at 002522425157.

Walls

Rasamaal block's combination of strength, moisture resistance and high thermal efficiency makes them the natural choice for cavity, solid, internal and party wall. Rasamaal blocks are light and remarkably easy to work, saving time and money.

Foundations

Rasamaal Foundation blocks combine strength and excellent thermal performance. They are available in a range of thicknesses; 100mm and above for cavity and 190mm and above for solid wall construction.

Hi-Strength

Rasamaal Hi-Strength blocks combine strength, thermal performance and are lightweight and easy to position. They are ideally suited to any building projects and are available for a variety of applications.
